STATE NEWS. Two STRINGS TO HER BOW-OR, Two We presume the President's remarks at Philadelphia are a fair sample, both as to length and quality, of the ferty or fifty speeches he will feel called upon to make during the electioneering tour on which he has just entered. on Friday morning the 10th last, and u
to the latest advices in London was sti
raging tremendously. A London pape
thus describes the conflagration: The extent of property in buildings and serchandise at present consumed is rough-realculated at £ 200,000 or £150,000. The ly calculated at £200,000 or £200,000. The fire broke out at about 7 o'clock on Friday morning in some merchanta' stores situate in the Place de Walborgo, a kind of square fronting the quay, and known as the com-mercial neighborhood of Antwerp. The buildings were chiefly lofty warehouses, illed with merchandize of overy descrip-tion, while in the basement stretched cr-temsive early filled with some thousand msive vaults filled with some thou barrels of petroleum oil and to the latter may be attributed the dreadful conse-quences that have befallen the city. The first range of warehouses stacked were first range of warehouses stacked were the three belonging to M. Dennis Haine, and by most the whole of them were in a blaze from end to end.

It then resched a magazina or depot

where there was stored some 10,000 by rels of petrofeum. The local fireme police and military strove every exertito stay its progress, and succeeded in rol a great many barrels out of the built on the quay, but the explosions and vel ment fury of the flames compelled them to retreat. During the whole day and night and following day the confligrations wept on with terrific force. The flaming petroleum from the shores in questions. petroleum from the shores in question poured out in a stream and flowed down into the range of the vaults above alluded to, where the larger quantity of petroleum was deposited, and which was all slong so much dreaded. The fire then increased in magnitude tenfold, and the explosions that followed shook the whole city, and brought down many houses, while many people are reported to have been killed.

The force of the explosions blew in the birning petroleum flowed, and by that means found its way into a good many houses in Rue da Saa's, and in many other

uses in Rue da San's, and in many atreets in the locality. The military dr the people out to a place of safety. Am the buildings that were subsequently sumed were the Hotel de Coburg, ended stores known as the Great Sw and Little Swan, and a series of others a commercial character. The engin that were brought into play were perfect there, and that belonged to a private firm at Antwerp. Most of the London fire offices have large insurances on the consumed property.

New York, Aug. 29.—The Post's Washington special says the efficers of the Treasury Department are busily ungaged in the conversion of seven thirties into five-twenties. The recent advance of the latter in the foreign market, having raised the value so much above the present high rat of seven-thirties, that is in very advante geous to make the conversion. The ideac placing a five per cent. Government less upon the market, which was abondone some time ago, has been revived, in consequence of the unprecedented rise in alchases of Government securities, and it is believed that the demand for our securities abread, will continue to increase. of the National Union Committee appointed in June, 1888, has been called to meet at Philadelphia on Monday, September 3d, and I shall be present on that occasion, taking part in its deliberations and its action. You have decreed it wise and proper to abandon the great Union Republican Party of the country and to counce your mans and influence with a new organization designed to destroy and defeat the cause with which I sympathize and of which I am in some small degree a representative.
